## Course Information

### Instructor Information

Name: Dr. Caleb McWhorter  
Office: Maguire 129  
Phone: 845.398.4077  
Email: [cmcwhort@stac.edu](mailto:cmcwhort@stac.edu)  
Office Hours: By appointment

### Class Information

Dates: January 3 – January 20  
Time: Online (Asynchronous)  
Classroom: Online  
Course Webpage: <http://coffeeintotheorems.com>

## Course Description

This course advances the skills necessary for students to connect quantitative thinking to real-world problems and everyday life situations. This course challenges students to understand the broad applicability of quantitative literacy and thinking—polls, charts, probability, statistics, economic data, and problem solving. *Foundation Category: Quantitative Literacy*

## Course Objectives

After this course, among other things, students should be able to...

- Understand and use logical symbols and connectives.
- Transform ‘real world’ reasoning into logical symbols and connectives.
- Understand and apply the connections between logic and digital logic circuits.
- Perform basic arithmetic using Egyptian, Roman, Mayan, and Babylonian notation.
- Understand and perform basic arithmetic in various bases.
- Understand elementary terminology in Game Theory, especially Combinatorial Game Theory.
- Find winning strategies in specific combinatorial games, e.g. subtraction games, NIM, etc.
- Perform computations with percentages, especially percent increase and decrease.
- Compute markups, markdowns, taxes, and tips.
- Understand and compute in various interest setups: simple discount notes, discrete/continuously compounded interest, etc.
- Perform computations with vectors algebraically and geometrically.
- Understand and apply vectors to game programming.
- Perform computations with matrices, especially solving simultaneous linear equations.
- Find maximums and minimums of linear functions in two variables.
- Understand and use the basic language of Graph Theory.
- Communicate the applications of Graph Theory
- Find or disprove the existence of Eulerian and Hamiltonian walks on graphs.
- Understand and use the basic language, concepts, and formulas of Probability Theory.
- Apply the laws of probability to real-world situations.
- Compute five-number summaries, means, IQRs, standard deviations, and expected values.
- Understand the use and misuse of Statistics in the real-world.
- Understand and apply normal and binomial distributions to real-world problems.
- Understand and apply the Central Limit Theorem.

Furthermore, students should...

- Improve their ability to engage in mathematical thinking, reasoning, communication, and problem solving.

- Develop a matured perspective on how to approach mathematical problems and concepts.
- Be able to state ways Mathematics applies to real world problems.
- Learn to properly utilize technology to explore, expand upon, or answer mathematical questions.
- Refine their cognitive skills by improving their ability to learn independently, approach problems imaginatively, solve problems methodically, and communicate solutions intelligibly.
- Understand how to apply mathematical thinking and problem solving techniques in other fields, problems, and situations.

## Course Materials

**Textbook.** There is no required textbook for this course. The primary reference for course topics will be lecture notes and related materials provided by the instructor.

**Calculators.** Basic graphing calculators will be allowed during the course, unless otherwise instructed. However, these will not be required. Any 'basic' calculator that has logarithmic and trigonometric functions (along with their inverses) will suffice. The course will make use of the computational engine Mathematica via the WolframAlpha website: <https://www.wolframalpha.com>. Although WolframAlpha does have a paid account option for additional resources, the course will not make use of these features and students *will not* be required to setup an account or make any kind of payment.

**Spreadsheet Software.** The course may also make use spreadsheet software such as Excel and GoogleSheets. However, Excel homeworks should be submitted as a .xlsx file. Students should have free access to these resources via their STAC accounts as well as on any campus computer. When using GoogleSheets, students should use their STAC provided Google account. Other online resources may be used in the course and will be provided by the instructor.

## Course Policies

### Grading Components

Course grades are determined by the following components:

Quizzes	5%
Biographies	5%
Homework	45%
Exams	45%

## Grading Scale

The grade scale is the standard St. Thomas Aquinas College grading scale and is as follows:

A	95 – 100	C+	77 – 79
A–	90 – 94	C	73 – 76
B+	87 – 89	C–	70 – 72
B	83 – 86	D	65 – 69
B–	80 – 82	F	0 – 64

## Course Format

The course will consist of five lectures per week. Each lecture is approximately three hours long, broken into two 1.5 hour lectures. However, Friday's lecture will typically be reserved for a review lecture (an hour and a half long) followed by time for an exam. While lectures will typically cover all the course material, students may be required to do outside reading. Therefore, you may be assigned reading from the course before lecture. Typically, lectures where readings are assigned will still cover course content; however, the focus of these lectures will be problem-solving. Therefore, be sure to do the assigned reading before the lecture. Regardless, students are expected to spend outside of class reading course material, studying extra materials, and solving additional problems. Finally, students are expected to typically spend approximately 3 hours per credit outside of class on course materials. However, some weeks this may be more or less.

## Attendance and Participation

**Attendance.** It is essential to your success in this course that you attend each lecture and participate in class discussions. It is also a federal requirement that students who do not attend or stop attending a class be reported at the time of determination by the faculty that the student never attended or stopped attending the class. Therefore, you are expected to attend each lecture and to show up on time. Attendance in this course will be measured by 'regularly' accessing and submitting course materials. Address any absence(s), anticipated or unanticipated, with the instructor as soon as possible. Should you anticipate an absence, you are to contact the instructor as soon as possible—at least twenty-four hours before the class, if possible. Certain absences from lecture(s) may be excused, depending on the reason for the absence. Determinations are made on a case-by-case basis at the discretion of the instructor. The student should discuss the issue with the instructor as soon as possible; however, to excuse an absence, the reason(s) for missing lecture(s) must be documentable and presented, if requested. However, remember that it is your responsibility to keep up with the course material regardless of attendance. *Four or more unexcused absences from lectures could result in receiving a grade penalty per additional absence or an 'F' in the course.*

**Participation.** Students are expected to participate in the course. This means attending class, paying attention, taking notes, submitting course materials (on-time), asking and answering questions when appropriate, etc. However, course participation does not begin and end at the 'classroom door.' Students are expected to review course material and complete course assignments. Typically, students can expect to spend approximately 3 hours per credit outside of class working for the course—although some weeks this could be more or less.

Students are highly encouraged to form study groups to help support themselves and their fellow students' learning. These groups can be used to review notes or additional resources, work on class activities, discuss homework problems, etc. However, these groups *should not* be used to simply solve problems for others or have others solve your problems for you. For instance, students may not 'assign' homework problems to each other to solve in order to complete assignments. Using study groups in this or similar manners is an academic integrity violation that will be dealt with harshly. If you are unsure if what plan on doing or are doing in study groups is appropriate, discuss this with your instructor.

## Quizzes

There will be a quiz corresponding to *every* class. Quizzes are meant to be short and simple. These quizzes serve more as a method of gauging whether you are keeping up with the material. The quizzes can be found on the course webpage as well as in the course GoogleDrive. Quizzes are submitted to the instructor via email. Students should include the quiz number in the email subject line. No work will be required—simply indicate your final quiz solution. Each quiz is due in the instructors email by 10 am on the assigned due date. No make-up quizzes will be given except under extraordinary circumstances determined on a case-by-case basis at the discretion of the instructor. Unless otherwise instructed, notes, or outside assistance of any kind allowed on quizzes.

## Biographies

One of the many purposes of this course is to help students get a better understanding of what Mathematics 'looks like' in the 'real-world.' Therefore, students will write short biographies of various mathematicians. These biographies will help students see how mathematicians apply Mathematics to 'real-world' problems. Moreover, these biographies will serve to highlight the lives of mathematicians, especially living mathematicians from underrepresented groups. Therefore, there will be an assigned biography corresponding to *every* class—often highlighting a mathematician discussed during lecture or a mathematician in a field related to the lecture topic. These biographies should be no shorter than half a page in length but should not be 'much' longer than a full page. Each page should have one-inch margins, size 11 font ('reasonably' chosen), and be single-spaced. Each biography should be similar to a biography found in a playbook, a textbook biography, or the alike, i.e. they highlight the life, work, and accomplishments of the assigned mathematician. Each biography should include the birth and death dates (unless they are living), the field of mathematics that the mathematician specializes in, and at least 3–5 'interesting' facts about the mathematician, and a 'reasonably' sized representative photo of the individual. Above all, these biographies should read 'smoothly.' These are submitted via your personal course GoogleDrive folder under the 'Biographies' section. Each biography is due by 10 am on their assigned due date. All biographies should appear in a single GoogleDoc with each mathematician appearing on their own page, i.e. one mathematician per page, in the order that they are assigned. The assigned biographies along with their due dates can be found on the course webpage as well as in the course GoogleDrive. No make-up biographies nor late submissions will be allowed except under extraordinary circumstances determined on a case-by-case basis at the discretion of the instructor.

## Homework

The only way to learn Mathematics is to do Mathematics! Therefore, there will be daily homework assignments. It is essential for students to complete all of the assignments for the course. Working on homework is the best way of engaging with course concepts and gauging one's mastery of the material. Moreover, homework is an essential portion of the course grade. Assignments should be started as soon as possible. Do not delay working through homework; it is easier to keep up than it is to catch up. Students may request extensions on homework assignments. Requests for extensions should be submitted to the instructor in a timely fashion—do not delay! However, do not simply assume that you will be able to receive extra time on an assignment and plan your schedule carefully. Except in exceptional circumstances, homework extensions on topics included in an exam will not be granted beyond that exam date. Any extensions, due dates, and grade penalties for late assignments will be determined by the instructor on a student-by-student basis.

You are encouraged to work with others on homeworks. Mathematics is a social activity! The purpose of working together on assignments is to engage with course topics, see different perspectives, ask questions, and have others look over your work. However, do not simply use others to do your assignments. You should also not allow other students to use you to complete their assignments. Of course, using online solutions is a violation of the St. Thomas Aquinas College academic integrity policies. If you are unsure of whether a particular resource is appropriate to use on an assignment, consult with your instructor first.

Homeworks may entail software or programming components. Access to any datasets required for these portions will be provided by the instructor. These portions may require a fair amount of independence on the part of the student. However, there are resources available to help you with these problems. Should you have difficulty with these problems, ask your instructor for help! Be aware that many of your fellow students may be more technologically literate and ask them for help as well! Anticipate that there may be technological issues and always start these problems early! Do not wait until the problem(s) are due to try to complete or submit them. You are responsible for submitting solutions and any files for computer-based problems on-time and in the proper format. Always check the file(s) after submission. Failure to adhere to these guidelines may result in grade deductions or rejection of submissions. There is no guarantee that any late solution(s) or file(s) will be accepted. However, if you experience technical difficulties, document the issues thoroughly.

Homeworks may be accessed via the course webpage as well as in the course GoogleDrive. Your homework solutions should include each problem with your solution clearly indicated and all work shown and thoroughly explained. Each problem should appear on its own page, i.e. one problem per page, with your name at the top of each page. You then scan these pages, combine them into a *single* PDF with the problems appearing in the correct order. This PDF is then uploaded to a GoogleDrive shared with you in the 'Homeworks' folder. The file should be renamed 'Homework #', where '#' is the homework number. Homeworks should be submitted by 10 am on the date that they are due. Anticipate that they may be problems and do not wait until the last minute to do and upload your assignments! Once you have submitted the PDF, be sure to check that the PDF has uploaded correctly, that the file is downloadable, and that you have followed all formatting requirements. You should not delete, re-upload, alter, etc. any homework that you have submitted after the due date or time has passed without instructor permission. Failure to follow all of these guidelines may result in point-deductions or your homework being rejected. Penalties will be determined by the instructor on a student-by-student basis. If there are issues in this process, be sure

to email the homework to your instructor right away so to as minimize any possible penalties that may be incurred.

## Exams

There will be three exams in this course, each worth 15% of the total course grade for a total of 45% of the course grade. The schedule of the exams can be found in the 'Course Schedule' section of the syllabus. However, these exam dates are subject to change. Students should not make plans to be unavailable before January 20th on/before that date. Each of the exams covers approximately the third of the course material proceeding the exam date. However, any course topics may appear on any exam. Before each exam, typically the day before, the procedure for that exam will be announced. Typically, exam submission procedures will be the same as for course homeworks, c.f. the 'Homework' section of this syllabus. Students who miss an exam should not expect to receive a make-up exam. There will be no make-up exams except under extraordinary circumstances, e.g. in the case of an emergency. However, determinations for make-up exams or other substitutions, with possible grade deductions, are made at the discretion of the instructor on a case-by-case basis. Unless otherwise instructed, no devices or materials other than those provided by the instructor are allowed on any exam. Exams will be found on the course webpage as well as in the course GoogleDrive.

## Mathematics Help

Be proactive about your success in the course! If you need help, there are many resources available to help you. Your first primary contact for help is the instructor. If you are struggling, attend office hours or send an email. Because this course is online and asynchronous, office hours will be by appointment. If you have questions, need help, or have any other issues or concerns, please, email your instructor right away to set-up an appointment. Do not wait to bring issues, course related or otherwise, to the attention of the instructor. There are also a number of resources available to you at St. Thomas Aquinas College: Center for Student Success, Academic Recovery Program, Writing Center, etc. Students looking for extra mathematics help should consult with the Academic Services Office in Spellman 106, via email at [academicservices@stac.edu](mailto:academicservices@stac.edu), or on the web at <https://www.stac.edu/academics/academic-services>. The Center for Student Success website is <https://www.stac.edu/academics/academic-services/center-student-success> and can be found at Spellman 111 or contacted at 845.398.4090.

## Respect Policy

Learning requires a healthy academic environment. A key component to this is respecting everyone's time—especially giving everyone time to fail, ask questions, and learn. Therefore, everyone should abide by the following respect policies:

The instructor will respect student's time:

- They will come prepared to help you understand the course material and prepare students for quizzes/exams.
- They will listen to student feedback on how to best help them succeed.

- They will return assignments, respond to emails, and give feedback in a timely fashion.
- They will be patient during the student learning process and will treat all students fairly.

Students will respect the instructor's time:

- They will be on time to class. Moreover, they will come prepared and pay attention during class.
- They will ask for help and communicate with the instructor in a timely fashion.
- They will keep track of assignments—completing them on time and to the best of their ability.
- They will read and follow course policies.

Students will respect each other's time:

- They will not be disruptive in class. If you need to call or text someone, take it outside of the classroom.
- They will work with each other to find solutions and understand course material. However, they will not simply solve problems.
- They will allow each other to make mistakes, ask questions, and participate in the learning process.
- They will use respectful language when speaking to or about one another.

### **Email Policy**

All email communication in this course should be done using your @stac.edu email account. Similarly, any digital course access and file submissions should be made using your @stac.edu email account. Abiding by federal guidelines, emails coming from a non-STAC email may not receive a response. Emails should be properly written: contain appropriate subject line, possess an opening and closing address, be understandable and contain appropriate language, be grammatically correct, have appropriate font style and size, etc. Emails which do not follow these guidelines may not receive a response.

### **Electronic Device Policy**

Students are expected to complete the course without the use of calculators or other computational devices on assignments, quizzes, exams, etc., unless otherwise instructed. Any unauthorized use of such devices are considered a violation of the academic integrity policies. During the course, <http://www.wolframalpha.com/>, <https://www.symbolab.com/>, and Mathematica will be used to demonstrate concepts give students an opportunity to be able to check work. However, these should only be used as instructed, and never during a quiz or exam. All electronic devices should be turned off and put away during class unless otherwise instructed or given specific permission. Use of such devices can result in dismissal from class.

## **Mental Health and Counseling Services**

If at any point during the semester, you feel overwhelmed with your class work, feel thoughts of depression/suicide, experience sexual assault/rape, experience problems with substance abuse or relationship abuse, or have any other struggles with physical/mental health, ***please seek help!*** The Counseling & Psychological Services (CAPS) at St. Thomas Aquinas College is a resource offering assistance with any issue you might have. There is ***never*** any shame in seeking help. If you or someone you know is struggling with any of these issues, ***speak out!*** The CAPS website can be found at <https://www.stac.edu/student-life/counseling-psychological-services>. CAPS is located in the upper level of the Romano Student Alumni Center and can be contacted at 845.398.4065. If you or someone you know is having issues with gender or sexual identity issues, CAPS is also there to create a safe space for those with marginalized genders and sexualities or those who might be struggling with these issues. Know that my office is a safe space and should you prefer any gender specific pronoun/name, please be sure to make me aware! Students may also make use of the College Health & Wellness Services located in the McNelis Commons Residence Life Complex, Apartment 2B which can also be contacted at [stachealth@stac.edu](mailto:stachealth@stac.edu) or 845.398.4242, as well as the Campus Ministry and Volunteer Services, directed by Nick Migliorino, located in the Romano Student Alumni Center and can be contacted at [nmiglior@stac.edu](mailto:nmiglior@stac.edu) or 845.398.4084.

## **Faith/Tradition Observances Policy**

The instructor recognizes the diversity of faiths and traditions represented in the campus community. Students should have the right to observe religious holy days according to their faith and traditions. Accordingly, students may notify their instructor, no later than the end of the second week of classes, of any classes that they will be missing due to religious or traditional observances. Students following this guideline will be excused from these classes. Under this policy, students should have an opportunity to make up any examination, study, or work missed due to these observances or have an equitable and appropriate substitution made. All policy and procedural decisions are made at the discretion of the instructor on a student-by-student basis.

## **Use of Student Work**

In compliance with the federal Family Educational Rights and Privacy Act (FERPA), registration in this class is understood as permission for assignments prepared for this class to be used anonymously in the future for educational purposes.

## **Course Materials Policy**

All course materials (defined to include, but not limited to, course handouts, video/audio lectures, assignments, quizzes, exams, etc.) are the intellectual property of the instructor or St. Thomas Aquinas College, unless the copyright is already explicitly held by some other individual, group, or other entity. Therefore, course materials are protected by United States copyright law, see Title 17 USC. Students in this course are permitted to download some course materials for personal use.

However, students are not permitted to (in print, digitally, or otherwise) share, distribute, sell, or publish course materials, either in part or in whole, without the instructors explicit written and signed permission along with a personal usage code. Unauthorized reproduction or distribution of course materials is a violation of intellectual property law, and is a violation of the student code of conduct. The instructor, or agent acting on behalf of the instructor with written and signed permission, also reserves the right to delete or disable any link to any course materials. In enrolling in the course, the student agrees to abide by this course materials policy in perpetuity.

## **Syllabus Policy**

The instructor reserves the right to revise, including substantially revise, the course syllabus at any time—with or without notification. By enrolling in this course, students agree to all the policies found in the syllabus. Wherever applicable, students also agree to follow syllabus policies in perpetuity, e.g. students may not provide unauthorized assistance, materials, etc. to students enrolled in future versions of this course.

## **Tips for Success**

- Be proactive about your success in the course.
- Do not procrastinate! Begin your assignments and studying early!
- Attend every lecture.
- Address issues immediately. Ask questions during class, recitation, office hours, etc.
- Form a study group! Working together will help you and others better understand the course material as you can work through different difficulties and offer each other clarifications on concepts.
- Do problems! Reading through your notes is not enough. Seek out new problems and work through them carefully. When you are done, check your answer. If you are wrong, examine carefully what misunderstanding occurred and how to avoid it in the future. If you were correct, examine if there was a faster way, check to see if your solution ‘flowed’ and was easy to read, and think over what concepts/computations were used and what ‘type’ of problem was the exercise.

## **College Policies**

### **Academic Integrity**

Academic integrity is a commitment to honesty, trust, fairness, respect, and responsibility within an academic community. An academic community of integrity advances the quest for truth and knowledge by requiring intellectual and personal honesty in learning, teaching, research, and service. Honesty begins with oneself and extends to others. Such a community also fosters a climate of mutual trust, encourages the free exchange of ideas, and enables all to reach their highest potential.

A college community of integrity upholds personal accountability and shared responsibility, and ensures fairness in all academic interactions of students, faculty, and administrators. While we recognize the participatory and collaborative nature of the learning process, faculty and students alike must show respect for the work of others by adhering to the clear standards, practices, and procedures contained in the policy described below.

Academic integrity is essential to St. Thomas Aquinas College's mission to educate in an atmosphere of mutual understanding, concern, cooperation, and respect. All members of the College community are expected to possess and embrace academic integrity.

### **Academic Dishonesty**

Academic dishonesty is defined as any behavior that violates the principles outlined above. St. Thomas Aquinas College strictly prohibits academic dishonesty. Any violation of academic integrity policies that constitutes academic dishonesty will be subject to harsh penalties, ranging up to and including dismissal from the College.

For all Academic Integrity violations, faculty must file a Student Conduct Academic Dishonesty Report, which will be shared with the Dean of the appropriate School, the Provost, and the student. The student will also have to file a Student Academic Integrity Violation Report. Please view the full policy and the associated forms at <https://www.stac.edu/academics/academic-integrity-policy>.

### **Electronic Use Policy**

Faculty members at St. Thomas Aquinas College have the discretion to regulate the use of electronic devices in their classes, and students should not use such devices without the expressed permission of the professor. This policy covers cell phones, tablets, laptop computers, or any other device the use of which might constitute a distraction to the professor or to the other students in the class, as determined by the professor. Students with documented disabilities should discuss the use of laptops and/or other electronic devices with their professor at the beginning of the semester.

When a professor designates a time during which electronic devices may be used, they are only to be used at the discretion of the faculty member and in accordance with the mission of the college. Professors may develop specific and reasonable penalties to deal with violations of these general policies. For more extreme cases of classroom disruption, refer to the College's Disruptive Student Policy.

Please note that a browser lockdown system may be implemented in order to prevent cheating during assessments such as exams and quizzes. Faculty are expected to confirm that these systems will work with students' laptops before requiring their use.

*Recording of Lectures:* Class meetings that include course content or identifiable student information are protected by the Family Education Rights and Privacy Act (FERPA), found at <https://www2.ed.gov/policy/gen/guid/fpco/ferpa/index.html>. At times throughout the semester, the faculty member may record their lecture. It is a best practice for faculty to notify participants that their session is going to be recorded. This recording **CANNOT** be shared with anyone who is not enrolled in this specific course section.

Students cannot personally record class sessions and then share them outside of the course, although they can maintain them for personal use.

### **Academic Accommodations for Students with Disabilities Statement**

---

St. Thomas Aquinas College values diverse types of learners and is committed to ensuring that each student is afforded equal access to participate in all learning experiences. If you have a learning difference or a disability—including a mental health, medical, or physical impairment—that would hinder your access to learning in this class, please contact Disability Services. They will confidentially explain the accommodation request process and the type of documentation that may be needed to determine your eligibility for reasonable accommodations. To learn more about academic accommodations for students with disabilities, please contact Anne Schlinck, Director of Disability Services, at [aschlinck@stac.edu](mailto:aschlinck@stac.edu) or call/text 845.398.4087. Disability Services is located in Room L102 in the lower level of Spellman Hall.

If you have already been granted academic accommodations at St. Thomas Aquinas College, you have the right to receive the academic accommodations that are listed on your Letter of Accommodation. Please understand that it is your responsibility as a student registered with Disability Services to provide your Letter of Accommodation to your instructor if you wish to use your accommodations in this course. If you will need to use your testing accommodations, please be sure to review the Disability Services Testing Accommodation Policies—Academic Year 2022–2023 found at [Disability Services Testing Accommodation Policies](#).

### **Sexual Misconduct Policy**

---

Students should be aware that faculty members are responsible employees and are required to report certain information to the STAC's Title IX Coordinator. If you inform your instructor about, or that person witnesses, gender- or sex-based misconduct, which includes sexual harassment, sexual assault, intimate partner or domestic violence, stalking, or any gender- or sex-based discrimination, the faculty member will keep the information as private as possible, but must bring it to the attention of STAC's Title IX Coordinator. Students should also be aware that disclosing such experiences in course assignments does NOT put the College on notice and will NOT begin the process of STAC providing assistance or response to those experiences.

Please remember that instances of gender- and sex-based misconduct that occur in virtual/online environments are covered by STAC's Title IX, Student Code of Conduct, and Faculty/Employee Conduct policies.

The College encourages individuals who experience, witness or become aware of alleged sexual misconduct to report the incident to the Title IX Coordinator. The College will assist individuals in contacting law enforcement, if desired. The College also provides individuals the opportunity to discuss alleged incidents with a trained professional on campus with the assurance that the discussion will be confidential.

The following reporting processes are:

- **Non-Confidential Reporting Resources:** If you would like to talk to the Title IX Coordina-

tor directly, you can contact Mr. Norman Huling ([nhuling@stac.edu](mailto:nhuling@stac.edu), 845.398.4068). Additionally, you also may report incidents or complaints to Title IX Deputy Coordinators, Ms. Nicole Ryan ([nryan@stac.edu](mailto:nryan@stac.edu), 845.398.4163) or Dr. Benjamin Wagner ([bwagner@stac.edu](mailto:bwagner@stac.edu), 845.398.4212), or you can contact the Office of Campus Safety and Security (845.398.4080). You can find more information at [www.stac.edu/titleix](http://www.stac.edu/titleix).

- **Confidential Reporting Resources:** If you would like to report to a confidential counseling resource who is not required to initiate a Title IX report, you may contact the following people on a confidential basis:

**Ms. Anne Walsh RN, BSN**

Director, Health and  
Wellness Services  
845.398.4242  
[awalsh@stac.edu](mailto:awalsh@stac.edu)

**Dr. Lou Muggeo**

Director, Counseling &  
Psychological Services  
845.398.4174  
[lmuggeo@stac.edu](mailto:lmuggeo@stac.edu)

**Dr. Alexa Gaydos**

Licensed Clinical Psychologist,  
Counseling & Psychological Services  
845.398.4065  
[agaydos@stac.edu](mailto:agaydos@stac.edu)

**Elysse Sellers, LCSW**

Licensed Clinical Social Worker,  
Counseling & Psychological Services  
845.398.4065  
[esellers@stac.edu](mailto:esellers@stac.edu)

**Center for Safety and Change**

<http://centerforsafetyandchange.org/>  
9 Johnsons Lane, New City, NY 10956  
845.634.3344

*Academic Semester  
On-Campus Office Hours  
Thursdays, 1 pm – 5 pm  
Romano Center,  
Alumni Center Room 21*

## **COVID-19 Related Policies and Procedures**

**Classroom Health and Safety Protocols** The health and safety of students, faculty, and staff on our campus is our top priority. In response to the ongoing COVID-19 pandemic, the STAC community will continue to work together to support compliance with recommended health and safety standards to optimize the learning experience while minimizing health risks.

1. **Follow quarantine and isolation guidelines.** If you feel ill, have recently tested positive for COVID-19, or have come into contact with someone who has tested positive for COVID-19, *do not* come to campus or leave your residence hall until you have been cleared to do so by STAC Health Services ([stachealth@stac.edu](mailto:stachealth@stac.edu)). It is important that you always contact STAC Health Services in any of these circumstances and follow the quarantine and isolation instructions given. Please also let your professor know if you cannot attend class.

2. **Mask policy.** Mask-wearing is optional on STAC's campus except for in the STAC Health and Wellness Center, where masks must be worn; however, you must wear a mask if you are directed to do so under our isolation/quarantine policy. Please note that individual professors may encourage students to wear masks in their classrooms, but masks cannot be required. In the event of an increase in COVID cases on campus, the College may decide to return to a mask requirement.
3. **Minimize shared equipment.** Individuals should avoid sharing equipment where possible. However, if equipment does need to be shared, please wipe it down with provided disinfecting wipes in between users and maintain physical distancing as much as possible.
4. **Disinfect your classroom space.** Students and faculty are encouraged to disinfect areas within their workspaces by cleaning these at the beginning and end of each class. This includes desk tops, seats, and equipment used during class. Disinfectant supplies will be provided.
5. **Practice good hand hygiene.** Individuals should wash their hands with soap and water for at least 20 seconds as often as possible or use personal hand sanitizers. Hand sanitizer stations are available throughout the campus.
6. **Respect each other.** Show concern for each other's health and safety, and remember that this is a stressful time for everyone.

### **COVID-19, Other Illness, and Absences**

As stated above, for the health and safety of the campus community, students who are ill *should not* attend classes. Students in the following situations must contact Health Services as soon as possible:

- Those who have tested positive for COVID-19 or are exhibiting COVID-19 related symptoms.
- Those who have been instructed to quarantine because of close contact with someone who has tested positive for COVID-19.

If a student cannot attend classes for any of the above reasons, they should:

1. Communicate this change with their instructor(s) via email. Contact instructors as soon as possible, preferably within 24 hours.
2. Keep up with coursework and participate in class activities as much as possible. Students are responsible for completing any work that they might miss due to illness, including assignments, quizzes, tests, and exams.
3. Reach out to the instructor if illness will require late submission or modifications of assignments; work with the instructor to reschedule exams and other critical academic activities before they are due.

## **Diversity and Inclusivity Statement**

St. Thomas Aquinas College is committed to creating an inclusive environment. Our community actively seeks the inclusion and full participation of individuals from groups that have historically experienced discrimination and prejudice. We are committed to a climate of mutual respect and inclusion, one in which diversity is a source of pride rather than a source of division. We encourage all persons—students, faculty, and staff alike—to reflect on their own experiences to explore the ways in which others’ experiences can and do differ; the goal is to use this reflection to learn about different values, cultures, and ways of thinking. Ultimately, a just and equitable society will be easier to realize if we do not exclude those who are different from us and instead practice empathy and inclusivity.

To that end, if you experience or are aware of bias, mistreatment, or discrimination based on a person’s (or your own) membership in a historically under-privileged or marginalized group, please contact one of the following individuals to share your concerns:

### **Samantha Bazile**

Director of Admissions &  
Chief Diversity Officer  
845.398.4104  
[sbazile@stac.edu](mailto:sbazile@stac.edu)

### **Cindy Garvey**

Associate Director  
of Financial Aid  
845.398.4098  
[cgarvey@stac.edu](mailto:cgarvey@stac.edu)

### **Ryan Gasser**

Associate Director,  
Student Development  
845.398.4108  
[rgasser@stac.edu](mailto:rgasser@stac.edu)

Faculty reserve the right to provide open and honest readings and discussions in their classes about personal and institutional biases and prejudices and other topics that may cause discomfort to some.

More detailed information about the College’s expectations and policies related to these matters can be found in the Student Handbook, specifically in the Student Code of Conduct, Section D: Harassment and Abuse, the Anti-Harassment Policy, and Rules and Regulations for Maintenance of Order.

## **Mental Health & Wellness**

As a student, you may experience a range of issues that can cause barriers to learning, such as strained relationships, increased anxiety, alcohol/drug problems, feeling down, difficulty concentrating and/or lack of motivation. These mental health concerns or stressful events may lead to diminished academic performance or reduce a student’s ability to participate in daily activities.

St. Thomas Aquinas College offers services to assist you with addressing these and other concerns you may be experiencing. If you or someone you know are suffering from any of the aforementioned conditions, you can learn more about the broad range of confidential mental health services available on campus via the Office of Student Development’s Counseling and Psychological Services (CAPS) by visiting <https://www.stac.edu/student-life/counseling-psychological-services> or calling 845.398.4065. CAPS is located on the 2nd Floor of the Romano Student Alumni Center (RSAC).

If you or someone you care about requires immediate assistance during the hours when CAPS is closed, you may reach out to Campus Safety at 845.398.4080. You can also reach an on-call mental health professional by dialing 988 on your phone or visiting the 24-hour emergency help service website at <https://988lifeline.org/>.

## Course Schedule

The following is a *tentative* schedule for the course and is subject to change.

Date	Topic(s)	Date	Topic(s)
01/03	Logic & Circuits	01/12	Graph Theory
01/04	Number Theory & Game Theory	01/13	Review & Exam 2
01/05	Financial Mathematics	01/16	MLK Day (No Class)
01/06	Review & Exam 1	01/17	Probability
01/09	Linear Algebra	01/18	Statistics
01/10	Linear Algebra	01/19	Statistics
01/11	Linear Algebra & Graph Theory	01/20	Review & Exam 3
