Name:

MATH 101

Spring 2022

HW 9: Due 04/12

"Algebra is the intellectual instrument which has been created for rendering clear the quantitative aspects of the world."

—Alfred Whitehead

Problem 1. (10pt) Showing all your work, factor the following completely:

(a)
$$x^2 - 14x + 48$$

(b)
$$2x^2 + 14x - 120$$

Problem 2. (10pt) Showing all your work, factor the following completely:

- (a) $x^2 19x$
- (b) $25 9x^2$

Problem 3. (10pt) Showing all your work, factor the following completely:

$$6x^2 - x - 12$$

Problem 4. (10pt) Use the discriminant of $f(x) = x^2 - 2x + 5$ to determine whether the quadratic function factors over the integers, reals, or complex numbers.
