MATH 101	"Poetry is a precise a thing as geometry." – Gustave Flaubert	
Fall 2022		
HW 18. Due 11/14		

**Problem 1.** (10pt) Solve the following equation and verify your solution:

$$4(x - 2) = 5 - 9x$$

**Problem 2.** (10pt) Solve the following equation and check your solution:

$$\frac{x-3}{1-x} = 5$$

**Problem 3.** (10pt) If f(x) = 5 - 3x and g(x) = -3(x + 8), will there be a solution to f(x) = g(x)? Explain.
